Passe-partout

Un Passe-partout est un carton dans lequel une ouverture a été découpée en biseau.

Pourquoi le passe-partout est-il essentiel à l'encadrement ?

- > Cadrer le sujet, notamment ceux aux bords irréguliers.
- > Isoler le sujet afin qu'il ne s'appuie pas directement sur le verre.

En jouant sur la taille des marges et sur le montage du passe-partout et du cadre, donnez une toute autre dimension à vos œuvres.

Artcare **Artcare**[™]

LES CONTRECOLLÉS ARTCARE APPORTENT UNE PROTECTION DURABLE À VOS ENCADREMENTS.

Pourquoi protéger vos sujets ?

L'œuvre n'est pas seulement attaquée par les agents polluants venant de l'extérieur, mais également par ses propres composants (cadre, carton de fond, adhésif).

Les atouts des cartons Artcare

_ Résistant dans le temps

Les contrecollés Artcare sont soumis aux normes les plus strictes pour protéger durablement et résister dans le temps.

_ Résistant à la lumière

Fabriqués avec des pigments et non des colorants, ils assurent les couleurs de vos encadrements pendant des années.

_ Filtre les polluants

La technologie unique du papier «Micro-Chambre» filtre les polluants néfastes. Votre photo est protégée contre les polluants et les acides environnementaux présents dans l'air.

_ Résistant à l'humidité

Contrairement aux colorants simples, les pigments Artcare n'absorbent pas l'humidité. Cela garantit la fidélité des couleurs et la protection de vos œuvres.
